

Negro's Physicians  
(NCA)

March 29, 1938

My dear Jenkins: ) Thanks for your very good letter of the 23rd. I am glad that you are sticking to a bit of venereal disease control. I have my doubts about Jersey coming through with anything of consequence. I have talked with the state health people a number of times without any real satisfaction. Newark seems to be pretty well tied up with present incumbents. They seem to have political preferment and I doubt could be ousted if any jobs are offered there.

I should like to add that I was very favorably impressed as a result of our interview and as a result of some inquiries which I made concerning you. If I can find a suitable opening for you, I will be sure to do it.

Very truly yours,

M. O. BOUSFIELD
