Dear Midian:

I have recently had a good deal of correspondence with Dr. West about Dr. Easterling of whom I am very fond. I think he worked with Dr. Easterling in Tuskegee and they both have much interest in the serology of tuberculosis from the practical point of view.

Dr. Easterling is a good worker and a very nice person. I can certainly recommend her on these bases. On the other hand the particular problem is a most difficult one. I can say this from my own personal experience as well as on the basis of some knowledge of the literature on the subject. If Dr. Easterling can find an institution where there is interest in the problem and some prior knowledge concerning it I think she would do well with it. Possibly Howard qualifies in these regards.

I trust you will like the book, -- certainly because the printers have done their work well.

Sincerely yours,

*W. A. Hinton*
