Journalism

Exceedingly interesting project  
study of health & medical care  
of low income group with colored habits  
in Delta Region -

He is a youngster - excellent record  
at North Carolina.

If he makes the study - may be he should  
first spend some time with Michael  
Davis or some such person getting  
background of work already done

For a newspaper man to want to  
devote himself to so definite & specific  
a problem of his region seems to  
me significant
