

1939

HERMAN GEORGE CANADY

36

Associate Professor of Psychology and Philosophy  
West Virginia State College

Psychology

Slightly over age

His project (study of variability of IQ  
in Negroes as against whites) will  
be hard to carry out convincingly

His undergraduate and graduate  
records (all at Northwestern) are good

Gilliland of Psychology Dept. Northwestern,  
gives him good recommendation

Rainey on basis of conference with Canady  
speaks doubtfully of value of the study  
Probably could not complete work for Ph.D. in one year  
He is asking for too much money (\$2,185)

B
