Dear Mr. Embree:

I hope that you are going to be able to see your way clear to making a grant to Dr. Mizell of the Provident Hospital of Fort Lauderdale, Florida. He needs to take some extra work in surgery this summer in order to make him more proficient in his work at the hospital and in the community.

From the attached papers you will see that he is playing a leading part in the improvement of medical service in that vicinity and from the report of his hospital which I sent you sometime ago you will see that he is doing most of the surgery for this community and for this he certainly ought to be better prepared.

Sometime ago you wrote me that you might consider a grant for him so that he could have this experience this summer. If you could expedite your decision it would be highly desirable.

Yours sincerely,
Kendall Weisiger

Dear Doctor:

The dire need of an opportunity for the Negro Physicians, Dentists and Pharmacists in the Southern part of Florida to Assemble themselves at least annually for the purpose of learning the new and reviewing the current practice in our rapidly advancing fields of Medicine, Surgery, Dentistry and Pharmacy, prompted the organization of this clinic.

The idea grew out of a meeting of the Dade County Medical Academy held in Fort Lauderdale, Florida, last fall. This clinic shall serve the same purpose to the Negro Physicians, Dentists and Pharmacists in the central and southern parts of Florida as the annual clinic at Tallahassee does for the Negro organization in the northern part of the state.

The time of year and distance of the clinic makes the new clinic an inducement to the Physicians, Dentists and Pharmacists in this section of the state.

You are expected to be present on May 13th, 1940, and to help make our first clinic a success. Become a charter member.

Yours very truly,

Von D. Mizell, M. D.
