REPORT:

April 16, 1936

Dr. Marshall Ellis Ross is a graduate Bachelor of Science, College of Arts and Sciences, Howard University, May 8, 1918; graduate Doctor of Medicine, College of Medicine, Howard University, June 9, 1922; internship Freedmen's Hospital, Washington, D. C., 1922-1923. Since this time he has engaged in the practice of medicine in New York City.

I have known Dr. Ross personally for approximately twenty years. I had him under my supervision when he was a student in Organic Chemistry in Howard University. He was well above the average as a student in college and maintained an excellent record as a student in the College of Medicine. I have had an opportunity to talk with him several times within the past four or five years.

I know he is capable and ambitious. He enjoys a good local professional reputation in the Harlem District of New York City. I believe, however, that considering the length of time he has been in practice and his age, he should be in a position to finance his own way so far as further training is concerned.
