

Name Harry James Long On leave at University of Michigan Field: Biology
 Head, Biology Department
 Wiley College, Marshall, Texas

Plan of Work

Diectophyme renale (the giant kidney worm), the largest known living Nematode, is known to produce death to certain mammals in several localities of the United States. It is my plan to trace the course of migration of this worm in the body of the final host from the time of penetration of the larva to the mature development of the parasite.

Wishes to work for Ph.D. degree under Dr. A. E. Woodhead at the University of Michigan. Has been admitted. Probable duration of work one year, beginning September 1942. Will return to present position.

Personal Data Born Decatur, Illinois, December 1897. Married, Age: 44
 one child. Wife teaches.

Undergraduate Work James Millikin University (Decatur), A. B., 1919.

Graduate Work Columbia University, A. M., 1928.
 University of Michigan, 1933-34, summer 1941, 1941 -.

Experience Instructor, Prairie View College, 1920-22, \$1400; instructor, Langston University, 1922-23, \$1600; professor, Paul Quinn College (Waco, Texas), 1923-27, \$1800; professor, Tennessee State College, 1928-29, \$2000; professor, Wiley College, 1929 -, \$2400.

Accomplishments Fellowships: General Education Board, 1933-34, \$1400.
 Has applied to General Education Board.
