Candidate **Walter Lincoln Hawkins** ✓

Special Field

Graduate Student
McGill University, Montreal, Quebec

Organic Chemistry

Plan of Work

The Confirmation of the Structure of the Alkaloid, Cytisine.

Would like to do work at University of Vienna; admitted. Duration of study one year to begin September, 1938.

Digest of Application

Born March, 1911, Washington, D. C. Single.

Ch. E. from Rensselaer Polytechnic Institute, 1932. M. S. from Howard University, 1934. Has attended McGill University 1936 to present as candidate for Ph. D. Sigma Xi.

Experiences: Washington, D. C., public schools, teacher, 1935-36, \$1,400.

Publications: 3,5-Diphenyl-4-hydroxyisoxazole, J. Amer. Chem. Soc. 56: 2190; 1934. Hydroxy Polyketones, II. Dibenzoylcarbinol, J. Amer. Chem. Soc. 58: 61; 1936. Studies in Lignin and Related Compounds. XXXII. The Occurrence of the Guaiacyl and Syringyl Radicals in Various Woods, J. Amer. Chem. Soc. 59:2447; 1937. Occurrence of Acetone and Syringic Aldehyde as Degradation Products of Lignin Substances, J. Amer. Chem. Soc. 59: 598; 1937.

Fellowships: Howard University, 1935-34, \$170. Howard Smith Research Fellowship, McGill University, 1937-38, \$500.
