How to Use This Book

For Children...

Make articulated paper dolls of nine dinosaurs and one flying reptile. Cut them out, put them together, and then use your imagination to make them come to life. The figures come in pairs—one waiting for your artistic touches of color and the other ready to cut and assemble.

Make puppets with string, craft sticks, or pipe cleaners, or try producing a stop-motion animation clip using magnets or felt.

For Parents and Educators...

Dinosaurs on the Move provides hands-on activities that will inspire the imagination and creativity of your children, whether they are eager learners who continually want more or reluctant students who need some motivation to learn.

Sharpen your children's storytelling abilities and fine motor skills with dinosaur puppets that come ready to cut and assemble. The figures are printed on sturdy paper and, when assembled with mini brads, are able to really move! Hole punches and mini brads are available at most craft stores and school supply stores as well as on our website.

Supply your kinesthetic learners with meaningful and easy-to-use activities. Dinosaur days will come alive as children create the moving figures and use them to act out stories. They will also learn fascinating facts about these great creatures: length, weight, habitat, diet, the location of fossil discoveries, and key features are provided for each dinosaur. Use this book independently or combine it with any natural history study.

For Museums and Historical Reenactors...

Inform and educate children about dinosaurs and reptiles as they visit your museum's collection or special exhibition. Let children take home a remembrance of their experience at your museum with *Dinosaurs on the Move*.

This book is dedicated to my father, Blase J. Furfaro. Thank you for your optimism and encouragement in the face of life's difficulties.

With gratitude to Dr. Kenneth Carpenter, former Director and Curator of Paleontology at the Prehistoric Museum USU, for his help in reviewing and editing the information presented in this book.
