Color Lens Attachments install easily on any L-Series with LED strobe devices to provide distinctive visual signaling.

Bezel Kits enable installers to easily turn any L-Series or L-Series with LED Fire or Plain device into a device that meets ECN/MNS requirements, or into a bilingual FIRE device. Bezel kits are available for all varieties and footprints of L-Series and L-Series with LED products and come in FIRE, ALERT, EVAC, AGENT, FEU, FOGO, FUEGO, FUEGO/FIRE, and Plain options making customization easy.

Universal Trim Rings for wall and ceiling mount devices allow for additional space within the backbox.

Surface Mount Back Boxes are the best solution in locations where you are mounting onto a hard surface. Red and White options provide best in class aesthetics for applications that require an exposed junction box. Surface Mount Back Boxes can be used with L-Series and L-Series with LED notification appliances.

The **Sync•Circuit Module** synchronizes the temporal coded horns and chimes and the flash timing of strobes.. Patented module technology also allows the silencing of horns or chimes on horn strobe and chime strobe models over a pair of wires. See the Sync•Circuit Datasheet for more information.
