Plastic Anchors – Tapered with Collar

Conical anchors are manufactured via injection molding and are designed to be used in conjunction with a sheet metal or wood screw. They can be used in solid and hollow wall applications, and in concrete, block, or brick. These anchors have a lip to prevent falling into deep holes or hollow walls and are not recommended for use overhead or in applications where holding values are critical.

Product Details

PN#	Screw Size	Drill Size	Length
20	4-6-8	3/16"	3/4"
21	6-8-10	3/16"	7/8"
22	8-10-12	1/4"	1"
23	12-14-16	5/16"	1-1/2"

Installation Instructions

1. Drill a hole into the base material to the depth of embedment required. The tolerances of the drill bit used must meet the requirements of ANSI Standard B212.15

2. Blow the hole clean of dust & other material. Tap the anchor into the hole until it is flush with the surface of the base material.

3. Position the fixture and insert the proper size screw through the fixture into the top of the anchor and tighten. Be sure screw thread fully engages the anchor body.

Technical Data Sheet

Max Load Capacities for Tapered Plastic Anchor with Collar in Normal-Weight Concrete

PN#	Screw Size	Embedment	Minimum Concrete Compressive Strength F _c
