2GIG-RPT100-345 345MHz Repeater

The 2GIG® 345MHz Repeater enhances 2GIG security systems by offering greater flexibility in wireless sensor placement. It can be strategically positioned to extend the range of 2GIG panels, making it ideal for larger projects.

This device repeats both 2GIG and Honeywell sensor signals to 2GIG panels. As a plug-and-play unit, the Repeater begins signal repetition immediately upon powering on. In the event of an AC power outage, its rechargeable battery ensures continuous operation.
