

NUMERA HOME SAFETY HUB

PERS 4200X & ACCESSORIES – BLENDING PERSONAL AND HOME SAFETY

Key Features

- **Connectivity Hub:** connects wirelessly with 2GIG® home sensors, and personal emergency wearables
- **Connected Care:** delivers user and environmental data to a user's family and care team
- **Peace of Mind:** automatic fall detection to provide 24x7 support even when nobody is around
- **Versatile:** the PERS-4200X console can be used standalone or with a 4G LTE cellular module

COMPLETE AGING IN PLACE SOLUTION

The Numera® PERS-4200X console brings forth a new and scalable next generation all-in-one Personal Emergency Reporting System. Numera from Nortek Security & Control, leveraging its Linear® PERS legacy and integrating with 2GIG® home control sensors, has developed a smart home personal security and safety ecosystem with options to suit any customer who is looking for the best tools for independent living.

With complementary lightweight wearables and an upgradeable ecosystem, the Numera Home Safety Hub suite of products ensures a safer and more protected home. With the included Personal Help Button Pendant, assistance is just a discreet button push away, and with automatic alerts of a potential fire or a fall in the home via 2GIG home sensors, help is summoned even when the user cannot react.

The hub combines information from sensing devices like CO and smoke detectors, motion and door-window sensors. Includes alerts from wireless personal emergency sensors and wearables in a single PERS console for seniors or others needing support while living alone.
