The formal fecture on Hippocrates. given Inst Friday by Dr. Ludwig Edelstein of the Johns Hopkins In striute of the History of Medicine. dealt principally with the interpretation of the Prognounce.

The interest he said which Hip poctates had in meteorological phe nomena and its effect upon health and in the other factors which enter into diagnosis was not a purely theoretical by a desire on the part of Hippocrates. and by extension, of the other medical practitioners of the third and fourth century B. De Edeletron made the assertion that the medical science of the Greeks was principally of this nature and that what knowledge was gained of the human body and of the effects of environment upon it was gained only for the purpose of making an impres sion. He gave a verbal picture of the itinerant medical practitioner of the day which accorded well with the historical data available.

The doctors travelled from town to town. They had no medical certificate to attest to their competency. not any diploma from a medical school They had therefore to persuade the prospective patient that they were eduable and that the patient was safe in entrusting himself to their cassion by the audience of the ideas care. The only way that they could provoked by Mr. Schwartz's talk do this was by progressization both of the pass and the future other words, the doctor had to be College and given each Sunday eveable to tell the patient what had been ning in the Library. #### STEP TO BETTER MANNERS

The news of the change that will take place at the beginning of next month in the way the food will be served in the dining hall was heard with no little pleasure by a great many, if not all. St. Johnnies.

In addition to the greater convenience afforded by the hall being open longer periods at meal times, many will appreciate the different atmosphere which follows the new arrangement. Undoubtedly the lessurely manner in which things are expected to be carried on hereafter will relieve a great deal of nervous tension which one encounters when eating there at present. Also the gentler pace should be a world of good to a number of pretty badly beaten digestive systems

The use of linen on the table would ordinarily be very helpful in bringing about the desired atmosphere, but in this case the long tables and the cloths will probably have a very peculiar and awkward effect.

Although probably impractical for the college, the ideal arrangement, with the given ends in view, would have the hall furnished with smaller tables, for five or six people. This would not only offer a typical dining room atmosphere, but it would be the most effective way to stimulate amiability

Un-captain Joe Silhavy, who played a bang-up game for the winners, dropped the ball through the tim for the first two points of the game a few seconds after the opening whistle. Most of the opening period was then spent by both teams in feeling each other out. Stone a passing was very erratic and Pinkney made many interceptions. Toward the end of the quarter Stern broke up a play and his shot via a pass from Slafkosky added two more points to the Pinkney total. The first quarter ended with the score 4.0

Play remained the same in the secend period with the first half winnees playing sloppier than ever and from the tiring losets Pinkney aggressively taking advantage of their mistakes.
