

RIZING

“ Skillsoft enables global access and collaboration across the organization in an efficient manner. Its microlearning assets, in particular, are ensuring high levels of leadership development application and increasing speed to competence for participants. ”

Mark O’Donnell, Senior Vice President, Operational Excellence, Rizing

BUSINESS CHALLENGE

Rizing is a global professional service provider specializing in SAP technologies for Human Capital Management, Enterprise Asset Management and Consumer Industries.

Rizing is growing rapidly, and the skills required to continue this success, are changing. To retain the best people, drive revenue and profitable growth, Rizing identified a need to provide an efficient and scalable leadership development solution.

For the learning program to be successful and deliver business value, it is critical that leaders gain a common language for leadership concepts, apply strategies into their daily leadership practices and directly apply the acquired skills to their job.

HOW SKILLSOFT® HELPED

Rizing worked with Skillsoft’s Professional Services to create a leadership development solution suitable for their global employees. The program featured six blended tracks delivered virtually, featuring Rizing subject matter experts and business leader presenters.

The solution gave Rizing leaders access to over 30 curated channels of on demand learning content from Skillsoft’s Leadership Development Program (SLDP) and was deployed via Percipio, Skillsoft’s intelligent learning experience platform.

Rizing is now consolidating its custom content into Percipio and using its custom channels, Embedded Learning Synchronized Assistant (**ELSA**) and mobile app to make learning readily available anywhere.

KEY METRICS
