

CREATE A FUTURE-FIT WORKFORCE WITH BLENDED, EXPERIENTIAL LEARNING PATHS

Drive learner engagement by embedding **new** live courses in Aspire Journeys.

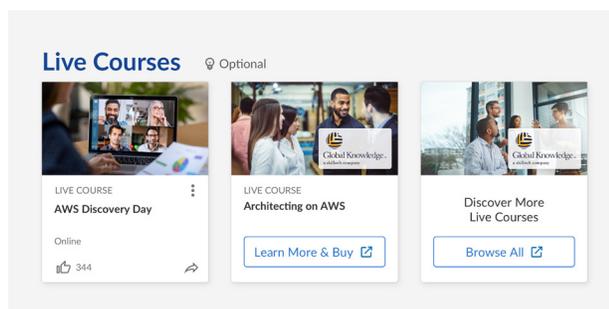

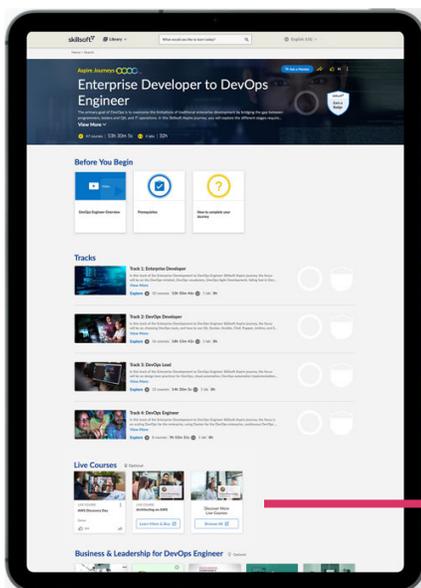

Empower your organization's tech and dev teams with access to a broader and deeper combination of self-paced and instructor-led training. Deliver the capabilities needed to keep up with the rapid pace of change in technology with intro-level virtual live courses delivered in the context of Skillsoft's role and skill-based learning paths, known as Aspire Journeys.

A GLIMPSE OF WHAT TO EXPECT

Aspire Journeys covering skills including Python, Cloud, DevOps, and Security will blend on-demand content with live, experiential learning opportunities. Learners will discover relevant virtual instructor-led offerings below the Aspire Tracks and optionally launch intro-level live courses at no charge.

OPTIONAL OPPORTUNITIES FOR MORE ADVANCED TRAINING

Site Administrators also have the option to provide learners with access to more advanced live courses available for purchase. To offer these advanced live courses, go to the Settings menu, select Site Configuration, and then Content Settings. From there, add a checkmark next to "Content that requires additional purchases." Site Admins may adjust this setting at any time.

BENEFITS OF THE NEW OFFERING

CREATE CONVERSATIONS AND INTERACTIONS

Combine the best of your digital learning content with an instructor-led course to take the mastery of a topic to a higher level. Simply put, some skill areas and programs require more conversation and interaction to reinforce learning.

CLASSROOM-QUALITY INSTRUCTION

Cater to multiple levels of expertise in the context of immersive, role-based, and skill-based learning paths while presenting opportunities to gain insights directly from top professional instructors.

INCREASE EFFICIENCY AND EFFECTIVENESS

Provide options for different people in different situations — whether through live, instructor-led courses, hands-on labs, bootcamps, on-demand video courses, or books, enabling learners to dive deeper into critical topics at their own pace.

FEATURES

- Live Courses embedded into relevant Aspire Journeys for Technology & Developer
- Intro-level live courses are available at no charge
- Organizations also have the option to provide a path for learners to purchase more advanced live courses
