SKILLSOFT COMPLIANCE

Cybersecurity, Privacy, and Data Protection Solution

IT SECURITY TRAINING DESIGNED FOR ALL EMPLOYEES

As compliance professionals, you face a fast-moving business landscape and an ever-evolving set of challenges: an increase in cyber attacks, the implementation of new data privacy laws, and the need to secure a remote workforce. Because your employees represent your company's first line of defense, it is essential to educate them to recognize risks and adapt to changing circumstances.

Skillsoft's Cybersecurity, Privacy, and Data Protection Solution covers both foundational and emerging risks areas, ensuring that you always have access to the most current and relevant content. Our learner-centric approach uses a mix of lesson formats and interactive exercises to strengthen engagement and improve retention. The flexible course design allows compliance leaders to assign a standard course or select standalone "shorts" to create a curriculum that addresses their unique needs.

BENEFITS

Relevant: Get up-to-date training on critical and emerging risk areas

Interactive: Improve understanding with engaging exercises and quizzes

Flexible: Mix and match shorts to create your own curriculum

66%

of employees have not received training on IT security for remote work. *- A Blueprint for COVID-19: Getting Back to the Office" Compliance Week, January 2021*

FEATURES

● **COURSE CONTENT**
Educate your workforce on a range of topics from foundational concepts like proper use of key business applications to emerging risk areas such as securing remote work environments.

● **FLEXIBLE APPROACH**
Select and assign specific short modules to create a curriculum that addresses a particular audience or unique business need.

● **INTERACTIVITY**
Each topic is supported by interactive exercises and quizzes to engage the learner and enhance understanding and retention.

● **TRANSLATION SUPPORT**
Deliver a consistent message to your global workforce with content available in multiple languages. Talk to your Skillsoft representative to learn more about language availability.

● **AUDITABLE REPORTING**
Assign, monitor, track, and report on training through Percipio Compliance or any learning management system.

COURSES

Cybersecurity and Online Habits: Lessons range from core concepts like avoiding phishing attacks and using online security features to new ways of working, such as virtual meeting best practices.

Privacy: These topics focus on major regulations, including GDPR and CCPA and best practices for identifying and protecting personally identifiable information.

Data Protection: Employees will learn how to use mobile devices securely, prevent data loss and theft, work securely in public places, and more.
