SKILLSOFT PERCIPIO COMPLIANCE

Transform learning and mandated training into an organizational advantage

Skillsoft Percipio Compliance is an industry-leading compliance learning system that incorporates the power of Skillsoft's intelligent learning platform, Skillsoft Percipio, with the robust compliance administrative capabilities, analytics, and functionality needed to meet your organization's complex needs.
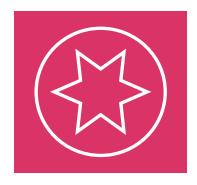

KEY FEATURES

POWERFUL TRACKING AND IN-DEPTH REPORTING

- Run reports for multiple groups or individual employees for an instant view of status and training progress

- Create customized dashboards with the ability to view underlying training data and generate personalized reports with enhanced reporting capabilities including comprehensive filtering and data export options

- Distribute email communications, including training notifications, to administrators, managers, supervisors, and employees

- Configure emails to run automatically at defined intervals, with training results sent to line managers or supervisors to help drive training completions

- Track training across all formats: online, classroom, on-the-job, and other offline training events

RECORDS MANAGEMENT

- Centralize management of training records through the integration of your organization's existing Human Resource Information System (HRIS)

- Maintain a complete and auditable training history for a thorough view of employee training assignments, including recurrences

- Aggregate online and instructor-led training records

- Manage training exemptions and equivalencies

- Automate training notifications and email reminders

SUPPORT FOR CONTENT CONFIGURATION

Customize Skillsoft compliance training courses to reflect regulatory requirements and organization-specific goals from a simple self-service interface

Insert documents, policies, non-instructional videos, and custom text and audio within the introduction, policy, and summary sections of any Skillsoft compliance training course

skillsoft

FLEXIBLE TRAINING ASSIGNMENTS

- Automatically assign training to individual employees or defined user groups based on demographics such as job role, corporate division, or geographic location

- Manage training assignments with one-time only or recurring options

- Set user-based completion dates or calendar-based due dates with recurrence intervals determined by the administrator

- Customize security levels, allowing supervisors, managers, and training administrators to access the features they need

USER-CENTRIC DESIGN

- Communicate key compliance initiatives to keep employees current on the training required due to regulatory requirements

- Employees may access courses from desktop or mobile devices in their preferred language

- View compliance training assignments through onscreen notifications with approaching deadlines prominently displayed

WHAT CAN SKILLSOFT PERCIPIO COMPLIANCE DO FOR YOUR ORGANIZATION?

- Unite your entire learning program under one platform, allowing for meaningful data collection to connect learning with business performance

- Deliver an enhanced user experience to improve learner engagement
