TRAIN FOR THE TEAM NOT THE TOOL

Harness DevOps Chaos and Thrive with Skillsoft

Developing an organization-wide DevOps culture requires different levels of training for evolving job roles. Specialists in one aspect may require hands-on experience and intensive skills development but more general knowledge and higher-level awareness in another. One size doesn't fit all. Vendor-centric, linear training models don't cover dynamic technologies or align with DevOps learning needs.

With Skillsoft, you'll train for the team, not the tool. In a world without a single standard, get a holistic view of various DevOps practices from professional instructors. Train your team by providing hands-on experience with appropriate tools and, more importantly, learning how each tool interrelates.

FASTER DEPLOYMENT. HIGHER QUALITY. BETTER EFFICIENCY.

TIE SKILLS TO KEY INITIATIVES

Get clarity through the chaos with Skillsoft's personalized learning platform. Access reporting and analytics to quickly identify your teams' skills gaps and impact performance with assignments and learning paths. Using the Skills Activity Dashboard, you'll find the people and teams who have — or are working on — specific skill sets.

PURPOSE-BUILT PATHS

These aren't crowd-sourced instructors. Courses are structured with a pathway supported by a narrative. Get the agnostic view of DevOps in the context of the role and how each tool fits in, not just a vendor's pitch.

DEVOPS SKILLS THAT STICK

There's more to DevOps than just knowing how to use a tool. Enable your team with durable skills to understand the WHY through hands-on practice labs for DevOps Software and Tools and live bootcamps.

POWER SKILLS TO DRIVE PROJECTS FORWARD

Tools are only half the battle of DevOps. Train your team with market-leading leadership & business courses from MIT SMR and more on crucial power skills like communication, collaboration, agility, design thinking, etc.

"DevOps empowers teams to be more productive and collaborative. You have to find out what brings the most immediate value and then continuously iterate on the delivery. A shared, customer-focused vision is one of the benefits a DevOps culture brings to an organization."

KEN MUSE, CONSULTING DIRECTOR AT WINTELLECT, A SKILLSOFT LEARNING PARTNER

FEATURES

- Thousands of courses across 67 subjects, 100+ Industry Certifications, and more

- More than 100 hands-on practice labs & coding sandboxes

- Live or on-demand Bootcamps: Full Stack Developer, AWS, Azure, Python, Agile/Scrum Bootcamps

- Leadership & Management Training for Tech Roles

- Role-Based Learning Paths:
  - DevOps Engineer to Cloud Architect
  - Enterprise Developer to DevOps Engineer
  - Enterprise Developer to Full Stack Developer
  - Software Tester to DevOps Automated Tester
  - Network Admin to Site Reliability Engineer (SRE)

- Proficiency-Based Learning Paths:
  - Automated Testing with Selenium
  - Serverless Deployments for Developers
  - Load Balancing Multi and Hybrid Cloud Solutions
  - Building Advanced Docker Skills
  - Building Advanced Kubernetes Skills

- Industry experts from Microsoft through WintellectNow, hands-on security expertise through Security Innovation, and more

- Thousands of market-leading books and audiobooks, such as "The Phoenix Project"

- Live mentors through chat or e-mail

BENEFITS

- 93% of employees would stay at a company longer if it invested in their careers and development. And every open role costs an average $68,000 in unrealized revenue (Korn Ferry, 2018). Skillsoft can reduce these unfilled roles by at least 5%.

- Leaders who used Skillsoft Percipio intelligent learning platform for digital leadership development have a 93% confidence rate that they effectively perform critical leadership practices today.

- In highly complex occupations, including managers and software developers, McKinsey reports that high performers are 800% more productive. Skillsoft users produce greater output more rapidly than non-users and report 8.1% more time spent driving projects forward.

- 25% of certified IT professionals seek yearly re-certification. Users of Skillsoft's certification prep materials are well-prepared to pass the proctored exam on their first attempt with an exam pass rate of 74% and 99% within two attempts.

COURSE CATEGORY HIGHLIGHTS INCLUDE:

- Automation & Scripting
- DevOps Agile Development
- Agile Methodologies
- DevOps Management
- Cross-Functional Collaboration
- Confronting your Assumptions
- BI & Monitoring
- Build Tools
- Cloud / IaaS / PaaS
- DevOps Collaboration Tools
- Configurarion & Provisioning
- Configuration Management
- Containerization
- Continuous Integration
- Core & Foundational-Level Learning
- Common DevOps Programming Languages
- Leading Effective Meetings
- Logging
- Testing
- Strategic Thinking
- CI/CD Best Practices
- DevOps Tools & Processes
