REUNITE YOUR LEARNERS IN THE FLOW OF WORK

Experience all of Skillsoft Percipio's benefits in Microsoft Teams' social, collaborative environment.

You've empowered many, if not all, of your learners to build skills remotely in the pandemic. By adapting to their logistical needs, you've maintained a pipeline of future-fit workers to drive your organization forward.
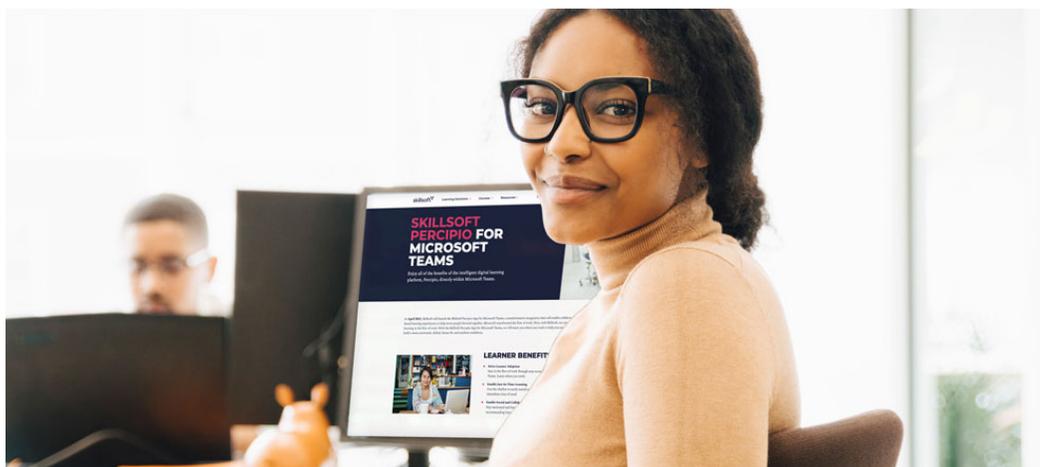

But something is missing.

While convenient, the abrupt shift to remote learning was born of necessity. And today, your learners need more than convenience — they're craving social connection in an era of isolation.

Your workforce needs you to restore the sense of community that once empowered them to build, share, and apply their knowledge — together. But "together" has a whole new meaning in a pandemic. So, learning professionals must meet employees where they are.

Even when the future of work ushers in a mix of remote, hybrid, and office-based working, there's still one boundary-transcending workspace that brings learners together — social, collaborative platforms such as Microsoft Teams and the 145 million users it unites daily.

With Skillsoft Percipio's app for Microsoft Teams, you'll engage your people in a community-driven platform where they'll learn in the flow of their work, their team, and across the company.

And **that's** how your organization will win. Because your workforce will do more than learn, they'll adapt and evolve together, wherever they are — gaining the future-fit skills your enterprise needs to compete and thrive.

EMPLOYEES SATISFIED WITH THEIR SOCIAL CONNECTIVITY ARE 2-3X MORE LIKELY TO MAINTAIN OR IMPROVE PRODUCTIVITY IN THE PANDEMIC[1]

37% OF CHROS ARE INVESTING IN NEW TOOLS TO SUPPORT VIRTUAL TEAMS, FOCUSING ON COLLABORATION AND INNOVATION[2]

BENEFITS OF THE PERCIPIO APP FOR MICROSOFT TEAMS

● **INCREASE ADOPTION WITH LEARNING IN THE FLOW OF WORK**
Learning professionals like you will be in the driver's seat. By enabling your workforce to learn in the continuously evolving flow of work, you can increase adoption and rekindle engagement.

● **LEARNING IN THE FLOW OF THE INDIVIDUAL**
Every employee using Percipio in Teams can learn in the format, schedule, and structure that's right for them. After finding the skills they need using the chatbot, learners can launch videos, books, audiobooks, hands-on practice labs — whatever their jobs call for at that moment. And they can do all of this without ever leaving Microsoft Teams.

● **LEARNING IN THE FLOW OF COMMUNITY**
Percipio for Teams also lets your people learn in the flow of community. Employees can instantly share helpful learning content with their peers, colleagues, and teammates, in impromptu chats, group meetings, brainstorm sessions, and more.

● **TEAM-BASED LEARNING**
Managers can facilitate virtual learning groups using native features such as Chat, Channels, and Teams to introduce and collaborate on relevant topics. They may recommend content, assign learning paths, and open the floor to discussion to help employees absorb what they've learned.

● **PROGRAM COHORTS**
Meanwhile, project leads can create learner cohorts and serve Skillsoft's role- and skill-based learning paths called Aspire Journeys. At each step along the way, learners can ask questions, share ideas, work together, and apply their growing knowledge towards urgent real-time needs, your organization's most prominent goals, and eventually, whatever business challenges the future may bring.

FEATURES

ONE-CLICK ACCESS TO EVERYTHING FOUND IN SKILLSOFT PERCIPIO

● Expertly curated, role-based, and skill-based learning paths.

● Personalized, AI-driven content recommendations.
