

CLNK

As of January 14, 2026

Fund Details

| | |
|----------------|----------------------------------|
| Ticker | CLNK |
| CUSIP | 09174Y106 |
| Exchange | NYSE Arca |
| Inception Date | January 13, 2026 |
| AUM* | Data pending |
| Sponsor | Bitwise Investment Advisers, LLC |
| Distributions | N/A |

* Assets Under Management (AUM) reflect non-GAAP, non-audited estimates by Bitwise Investment Advisers, LLC. Please refer to important disclosures at the end of this document.

Fees

| | |
|-----------------------|-------|
| Sponsor Fee* | 0.34% |
| + Other Expenses | 0.00% |
| = Gross Expense Ratio | 0.34% |
| – Fee Waiver** | 0.34% |
| = Net Expense Ratio | 0.00% |

* The Sponsor Fee includes custody charges for holding the Fund’s assets charged by the custodian, as well as customary fees and expenses of the fund administrator and auditor.

** For a period of three months commencing on the day the Shares are initially listed on the Exchange, the Sponsor has agreed to waive the entire Sponsor Fee on the first \$500 million of Trust assets. Brokerage and commission costs may apply.

Bitwise Chainlink ETF

CLNK’s principal investment strategy is to invest directly in Chainlink (LINK). The Fund is a professionally managed and cost-efficient ETP. Its LINK holdings are held at Coinbase Custody, one of the world’s leading crypto asset custodians.

CLNK is not suitable for all investors. An investment in the Fund is subject to a high degree of risk, has the potential for significant volatility, and could result in significant or complete loss of investment. The Fund is not an investment company registered under the Investment Company Act of 1940 (the “1940 Act”), and therefore is not subject to the same protections as mutual funds or ETFs registered under the 1940 Act.

Why Invest?

- 1

LINK Exposure in an ETP Wrapper. CLNK provides cost-efficient exposure to the price movement of Chainlink (LINK), the oracle network that brings real-world information to blockchains.
- 2

LINK’s Upside Potential. As adoption of real-world use cases like tokenization, prediction markets, and DeFi grows, Chainlink is uniquely positioned to capture demand for reliable, real-time information in the crypto ecosystem.*
- 3

An ETP Backed by Crypto Specialists. In choosing CLNK, investors gain access to a team of crypto experts with the tools, insights, and specialized experience to help them navigate the space with confidence.

* Tokenization is the process of representing ownership rights or value of a real-world asset (like real estate, bonds, or company shares) as a digital token on a blockchain.

Performance (%)

| | 1MO | 3MO | YTD | 1YR | 3YR | 5YR | SINCE INCEPTION |
|---------------------|-----|-----|-----|-----|-----|-----|-----------------|
| CLNK (NAV) | — | — | — | — | — | — | — |
| CLNK (Market Price) | — | — | — | — | — | — | — |
| Chainlink (LINK) | — | — | — | — | — | — | — |

Performance of greater than one year is annualized. The performance quoted represents past performance and does not guarantee future results. Short-term performance, in particular, is not a good indication of the Fund’s future performance, and an investment should not be made based solely on returns. Investment return and principal value of an investment will fluctuate so that an investor’s shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 1-415-707-3663.

Correlations

| | S&P 500 | US AGG BOND | GOLD | BITCOIN |
|------------------|---------|-------------|------|---------|
| Chainlink (LINK) | — | — | — | — |

Correlations shown are the average daily correlation for the last year, excluding weekends and market holidays. See glossary for index definitions. Past performance is no guarantee of future results.

Glossary

Beta measures the volatility of the Fund price relative to the volatility in the market index.

The **Bloomberg U.S. Aggregate Bond Index** is designed to measure the performance of publicly issued U.S. dollar denominated investment-grade debt.

Chainlink is represented by the CME CF Chainlink-Dollar Reference Rate - New York Variant (LINKUSD_NY).

Correlation measures the degree to which a pair of variables are linearly related.

Gold is represented by the spot gold price with data from Bloomberg.

The **S&P 500® TR Index**, or Standard & Poor's 500 Total Return Index, is a market-capitalization-weighted index of 500 leading publicly traded companies in the U.S.

Standard Deviation is a statistical measurement measuring return variability.

About Bitwise

Bitwise Asset Management is a global crypto asset manager with more than \$15 billion in client assets and a suite of over 40 investment products spanning ETFs, separately managed accounts, private funds, hedge fund strategies, and staking. The firm has an eight-year track record and today serves more than 5,000 private wealth teams, RIAs, family offices and institutional investors as well as 21 banks and broker-dealers. The Bitwise team of over 140 technology and investment professionals is backed by leading institutional investors and has offices in San Francisco, New York, and London. Risks and Important Information

This material must be accompanied by a prospectus. Please read the prospectus carefully before investing. To obtain a current prospectus visit clnketf.com/welcome.

The Bitwise Chainlink ETF (CLNK) is not suitable for all investors. An investment in CLNK is subject to a high degree of risk, has the potential for significant volatility, and could result in significant or complete loss of investment. CLNK is not an investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”) and therefore is not subject to the same protections as ETFs and mutual funds registered under the 1940 Act. An investment in CLNK is not a direct investment in Chainlink (LINK).

Shares of ETPs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. The NAV may not always correspond to the market price of LINK and, as a result, Creation Units may be created or redeemed at a value that is different from the market price of the Shares. Authorized Participants' buying and selling activity associated with the creation and redemption of Creation Units may adversely affect an investment in the Shares.

The amount of LINK represented by a Share will continue to be reduced during the life of the Fund due to the transfer of the Fund's LINK to pay for the Sponsor's management fee, and to pay for litigation expenses or other extraordinary expenses. This dynamic will occur irrespective of whether the trading price of the Shares rises or falls in response to changes in the price of LINK.

There is no guarantee or assurance that the Fund's methodology will result in the Fund achieving positive investment returns or outperforming other investment products.

Investors may choose to use the Fund as a means of investing indirectly in LINK. Because the value of the Shares is correlated with the value of the LINK held by the Fund, it is important to understand the investment attributes of, and the market for, LINK.

LINK Risk. There are significant risks and hazards inherent in the LINK market that may cause the price of LINK to fluctuate widely. The Fund's LINK may be subject to loss, damage, theft or restriction on access. Investors considering a purchase of Shares should carefully consider how much of their total assets should be exposed to the LINK market, and should fully understand, be willing to assume, and have the financial resources necessary to withstand the risks involved in the Fund's investment strategy.

Liquidity Risk. The market for LINK is still developing and may be subject to periods of illiquidity. During such times it may be difficult or impossible to buy or sell a position at the desired price. Possible illiquid markets may exacerbate losses or increase the variability between the Fund's NAV and its market price. The lack of active trading markets for the Shares may result in losses on investors' investments at the time of disposition of Shares.

Regulatory Risk. Future and current regulations by a U.S. or foreign government or quasi-governmental agency could have an adverse effect on an investment in the Fund.

Blockchain Technology Risk. Certain of the Fund's investments may be subject to the risks associated with investing in blockchain technology. The risks associated with blockchain technology may not fully emerge until the technology is widely used. Blockchain systems could be vulnerable to fraud, particularly if a significant minority of participants colluded to defraud the rest. Because blockchain technology systems may operate across many national boundaries and regulatory jurisdictions, it is possible that blockchain technology may be subject to widespread and inconsistent regulation.

Nondiversification Risk. The Fund is nondiversified and will hold a single issue. As a result, a decline in the market value of a particular issue held by the Fund may affect the Fund's value more than if it invested in a larger number of issuers.

Recency Risk. The Fund is recently organized, giving prospective investors a limited track record on which to base their investment decision. If the Fund is not profitable, the Fund may terminate and liquidate at a time that is disadvantageous to Shareholders.

Bitwise Investment Advisers, LLC serves as the sponsor of the Fund. Foreside Fund Services, LLC serves as the Marketing Agent for CLNK, and is not affiliated with Bitwise Investment Advisers, LLC, Bitwise, or any of its affiliates.
