How is Super Gro Unique?

- Super Gro is a multi purpose surfactant that reduces water surface tension.
- Results in the plants making better use of the water provided to them by:
 - Ensuring optimal soil penetration.
 - Reducing runoff and evaporation.
- Suitable for use on all indoor and outdoor vegetation.

Functions of a Surfactant:

- As a wetting agent to lower surface tension of water.
- As a water spreader for better plant coverage.
- Act as a sticker and dispersing agent for agricultural treatments.

Why Use GNLD's Super Gro?

- **Versatile and economical** - Optimises the use of water and enhances the performance of associated agricultural treatments (when used according to the manufacturer's recommendations), enabling Super Gro to perform a wide variety of functions.
- **Concentrated** - A little goes a long way.
- **Effective** - Super Gro maximises the benefits achieved from any watering efforts.
- Easy to use, indoors and out.
- Long shelf life.
- Non-toxic, non-caustic and non-flammable.

How to Use Super Gro

- Mix in a ratio of 1 : 1,000.
- 1 ml of Super Gro per litre (1,000 ml) of water;
5 ml of Super Gro per 5 litres (5,000 ml) of water;
20 ml of Super Gro per 20 litres (20,000 ml) of water.
- **Manual watering:**
Fill a container with water, add Super Gro and agitate gently.
- **Automated watering (Irrigation system):**
Add Super Gro to the water reservoir in the appropriate ratio.
