TM Forum Open APIs

Conformance Certification

Company Name: Vodafone Group (Reference Implementation)

TM Forum Open API Name: TMF681 - Communication Management

TM Forum Open API Release Version: 4.0.0

Report Date: 09/10/2023
1. **What Product or Solution does your API support?**

Provides the capability to create and send communications, notifications and instructions to Parties, Individuals, Organizations or Users.

**Use case:**
This API may be used by consumer applications to create and send communications, notifications and instructions to Parties, Individuals, Organizations or Users.

**Communication Message**
- List or find CommunicationMessage resources.
- Create a CommunicationMessage resource.
- Retrieve a CommunicationMessage resource by Id.
- Partially update a CommunicationMessage resource
- Delete a CommunicationMessage resource.

2. **Overview of Certified API**

Provides the capability to create and send communications, notifications and instructions to Parties, Individuals, Organizations or Users.

3. **Architectural View**

Frontend channels/application that invokes TMF681 Communication Management API exposed via an API Management layer. Request traverses the TMF microservice layer towards the secure backend system to send the communications.
4. Test Results

Comprehensive functional and non-functional testing techniques were employed during the evaluation of the API. This rigorous testing process encompassed various aspects, including authentication, authorization, and the overall API functionality.

The API underwent thorough functional testing to ensure that all interface operations performed as expected. Test cases were designed to validate the accuracy and completeness of the retrieved data.

Non-functional aspects were validated ensuring encompassed performance testing, which assessed the API's response time, scalability, and overall system load handling capacity. Additionally, security testing was conducted to identify and mitigate vulnerabilities that could potentially compromise the API's security posture.
The conformance verification process for the REST API successfully validated its functionality, security, and alignment with the Business Process Framework. The rigorous testing procedures, including authentication, authorization, functional, and non-functional testing, ensure that the API is robust, secure, and capable of providing reliable communication mechanism.

In conclusion, TMF681 Communication Management API v4.0.0 serves as a vital component to ensure the reliable communication as a service. Its adherence to conformance standards and rigorous testing procedures underscores its reliability and utility.

For any inquiries or further details about this conformance verification report, please contact the Digital Engineering team of Vodafone Group.
