TM Forum Open APIs

Conformance Certification

Company Name: Vodafone Group (Reference Implementation)

TM Forum Open API Name: 
**TMF670 – Payment Method Management**

TM Forum Open API Release Version: 4.0.0

Report Date: 12/01/2024
1. **What Product or Solution does your API support?**

The TMF670 Payment Methods Management V4 API enables consumer apps to manage Payment methods available for their customers.

2. **Overview of Certified API**

This API lets you access a list of payment methods and the details of a specific payment method, access payment methods associated with a customer account, create a new payment method, update or delete a single, or bulk payment methods.

**Key Features**

- Retrieves a list of payment methods.
- Creates a new payment method.
- Retrieves a payment method.
- Deletes a payment method.
3. Architectural View

Frontend channels/application that invokes TMF670 Payment Methods Management API exposed via an API Management layer. Request traverses the TMF microservice layer towards the secure backend system to manage the payment methods.
4. Test Results

Comprehensive functional and non-functional testing techniques were employed during the evaluation of the API. This rigorous testing process encompassed various aspects, including authentication, authorization, and the overall API functionality.

The API underwent thorough functional testing to ensure that all interface operations performed as expected. Test cases were designed to validate the accuracy and completeness of the retrieved data.

Non-functional aspects were validated ensuring encompassed performance testing, which assessed the API's response time, scalability, and overall system load handling capacity. Additionally, security testing was conducted to identify and mitigate vulnerabilities that could potentially compromise the API's security posture.

The conformance verification process for the REST API successfully validated its functionality, security, and alignment with the Business Process Framework. The rigorous testing procedures, including authentication, authorization, functional, and non-functional testing, ensure that the API is robust, secure, and capable of providing reliable payment methods management mechanism.

For any inquiries or further details about this conformance verification report, please contact the Digital Engineering team of Vodafone Group.
