1. **What Product or Solution does your API support?**

TM Party Management API provides an open and standard request and response API mechanism to create and retrieve TM partners from TM BSS. BSS will invoke the API to register new partners and other TM ecosystems are able to retrieve the list of partners by invoking this API.
2. **Overview of Certified API**

This API performs the following operations:

1. Retrieve a List of Individual and Organization resources depending on filter criteria using the GET.
2. Retrieve an Individual and Organization resource using the GET operation.
3. Create an Individual and Organization resource using the POST operation.
3. Architectural View
4. Test Results
