Company Name: TM Technology Services Sdn. Bhd.

TM Forum Open API Name: TMF633 – Service Catalog Management

TM Forum Open API Release Version: 4.0.0

Report Date: 30/01/2024
1. **What Product or Solution does your API support?**

TM Service Catalog Management API provides an open and standard request and response API mechanism to create and retrieve Service Specifications from TM Service Orchestration System. BSS will invoke the API to create new Service Specifications and other TM ecosystems are able to retrieve the created Service Specifications by invoking this API.
2. Overview of Certified API

This API performs the following operations:
1. Retrieve a List of Service Specifications resources depending on filter criteria using the GET.
2. Retrieve a List of Service Specifications resource using the GET operation.
3. Create Service Specifications resource using the POST operation.
