1. **What Product or Solution does your API support?**

TM Partnership Type Management API provides an open and standard request and response API mechanism to create and retrieve TM partnerships and partnership specifications from TM BSS. BSS will invoke the API to create new partnership and partnership specification information and other TM ecosystems are able to retrieve the list of partnership and its specification information by invoking this API.
2. Overview of Certified API

This API performs the following operations:
1. Retrieve a List of Partnership and Partnership specifications resources depending on filter criteria using the GET.
2. Retrieve Partnership and Partnership specifications resource using the GET operation.
3. Create a Partnership and Partnership specifications resource using the POST operation.
