Company Name: TM Technology Services Sdn. Bhd.

TM Forum Open API Name: TMF640 – Service Activation Management

TM Forum Open API Release Version: 4.0.0

Report Date: 20/03/2024
1. **What Product or Solution does your API support?**

TM Service Activation Management API provides an open and standard request and response API mechanism to activate and retrieve activated services from TM Activation System. BSS will invoke the API to activate new services and other TM ecosystems are able to retrieve the activated services by invoking this API.

2. **Overview of Certified API**

This API perform the following operations:

1. Retrieve a List of Activated Services resources depending on filter criteria using the GET.
2. Retrieve a List of Activated Services resource using the GET operation.
3. Create (Activate) a Service resource using the POST operation.
