TM Forum Open API Name: TMF669 – Party Role Management

TM Forum Open API Release Version: 4.0.0

Report Date: 20/03/2024
1. **What Product or Solution does your API support?**

TM Partnership Type Management API provides an open and standard request and response API mechanism to create, retrieve, update and remove Party Role (e.g. roles of a company) from TM BSS. BSS will invoke the API to create, update and remove party role information and other TM ecosystems are able to retrieve the list of party roles by invoking this API.

2. **Overview of Certified API**

This API performs the following operations:
1. Retrieve a List of Party Roles resources depending on filter criteria using the GET operation.
2. Retrieve Party Roles resource using the GET operation.
3. Create a Party Role resource using the POST operation.
4. Update a Party Role resource using the PATCH operation.
5. Delete a Party Role resource using the DELETE operation.
