TM Forum Open APIs

Conformance Certification

Company Name: TM Technology Services Sdn. Bhd.

TM Forum Open API Name: TMF696 – Risk Management

TM Forum Open API Release Version: 4.0.0

Report Date: 20/03/2024
1. **What Product or Solution does your API support?**

TM Risk Management API provides an open and standard request and response API mechanism to create a risk assessment related with a Party Role (e.g. individual / organization), risk assessment related with a product offering to the Party Role and retrieve risk assessments related with the Party Role and product offering related to the Party Role. BSS will invoke the API to create the risk assessment and other TM ecosystems are able to retrieve the related information by invoking this API.

2. **Overview of Certified API**

This API performs the following operations:
1. Retrieve a List of PartyRoleRiskAssessment and PartyRoleProductOfferingRiskAssessment resources depending on filter criteria using the GET.
3. Create a PartyRoleRiskAssessment and PartyRoleProductOfferingRiskAssessment resource using the POST operation.
