1. **What Product or Solution does your API support?**

Amdocs Kenan FX is a comprehensive and robust system that delivers superior customer management, ordering and billing for any service and payment type. Amdocs Kenan FX billing system offers easy integration with REST and TMF APIs, making it compatible with other system and applications.

With Payment APIs Amdocs Kenan FX billing system provides the communication service providers (CSPs) with the capabilities need to manage their payment.
2. **Overview of Certified API**

TMF676 Payment Management API provides a standardized solution to support management of Payments. This API allows the following operations:

- Retrieve a list of Payments stores in a server filtered by a given criteria.
- Retrieve a specific Payment.
- Create a Payment.

- Retrieve a list of Refunds stored in a server filtered by a given criteria
- Retrieve a specific Refund
- Create a Refund

This API allows creation and retrieval of Payments and Refunds.

The API exposes a consistent set of operations that can be consumed by various systems requiring Payment services.

The API has been certified using the TMF676 Conformance Test Kit(CTK)
