TM Forum Open API Name: TMF716 – Resource Reservation Management

TM Forum Open API Release Version: 4.0.0

Report Date: 25/06/2024
1. **What Product or Solution does your API support?**

The scope of the requirement is that Etisalat intends to adopt Open API/ODA standards and become a TM Forum Open API compliant, the objectives behinds this adoption are to achieve plug-and-play interoperability of components within their IT systems, reduce complexity and enable digitization of customer-facing systems and reduce cost of integration as well as time to market for new services digital services, TMF716 Resource reservation API is chosen to be implemented as part of this project.
2. Overview of Certified API

The TMF716 Resource reservation API intents to provide a consistent and standardized mechanism to reserve a resource during the fulfilment process. This API can be used to query the resource reservation instances, create resource reservation instances, and update resource reservation instances.

The Resource Reservation API can be called by the Service or Resource Order Management to create a new resource reservation instance or update an existing resource reservation instance in the Resource Inventory.
