

# **TM Forum Open APIs**

## **Conformance Certification**

*Company Name: **TM Technology Services Sdn. Bhd.***

*TM Forum Open API Name:  
**TMF645 – Service Qualification***

*TM Forum Open API Release Version: **4.0.0***

**Report Date: 13/06/2025**

## 1. What Product or Solution does your API support?

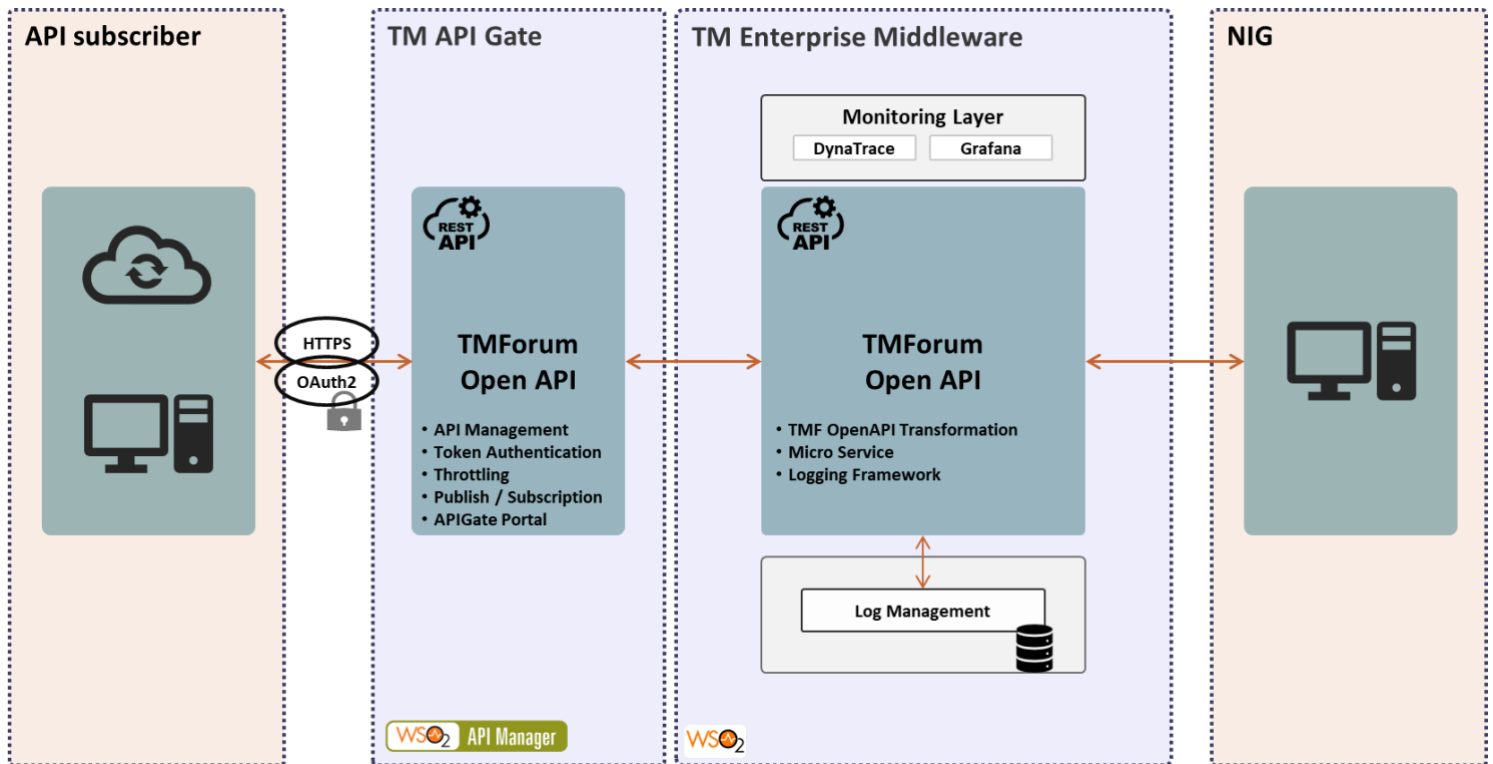

TM Service Qualification API provides an open and standard request and response API mechanism to check any service eligibility from Network Integration Gateway (NIG). NIG is a platform to retrieve & update network information from the existing network inventory database

## 2. Overview of Certified API

This API perform the following operations:

1. Retrieve a List of services which response on when any existing offering services are expected to be ready using the GET operation.
2. Retrieve a List of services which response on when any future offering services expected to be ready using the GET operation.
3. Retrieve specific service availability status (e.g unavailability reason, service state etc) based on the expected service availability date using the POST operation.
4. Retrieve eligible service specification based on specific search criteria (i.e category, service type) using the POST operation.
