TM Forum Open APIs Conformance Certification

Company Name:

Globberry

TM Forum Open API Name:

TMF673 – Geographic Address Management

TM Forum Open API Release Version:

4.0.0

Date: 06/08/2025

1. What Product or Solution does your API support?

Globberry Boreas Network Inventory and Boreas NFVI Manager are comprehensive solutions, delivering automated discovery, accurate inventory management and actionable analytics to streamline telecom operations.

They provide a real-time automatic discovery, precise inventory management and insightful analytics through an intuitive, customizable interface.

Geographic Address management also belongs to Solutions core capabilities; thus, they benefit directly from compatibility with industry standard APIs like TMF673.

Support for this API allows external BSS to access stored geographic address data of specific network entities in a unified, structured manner, providing feasibility and availability check functionality in particular.
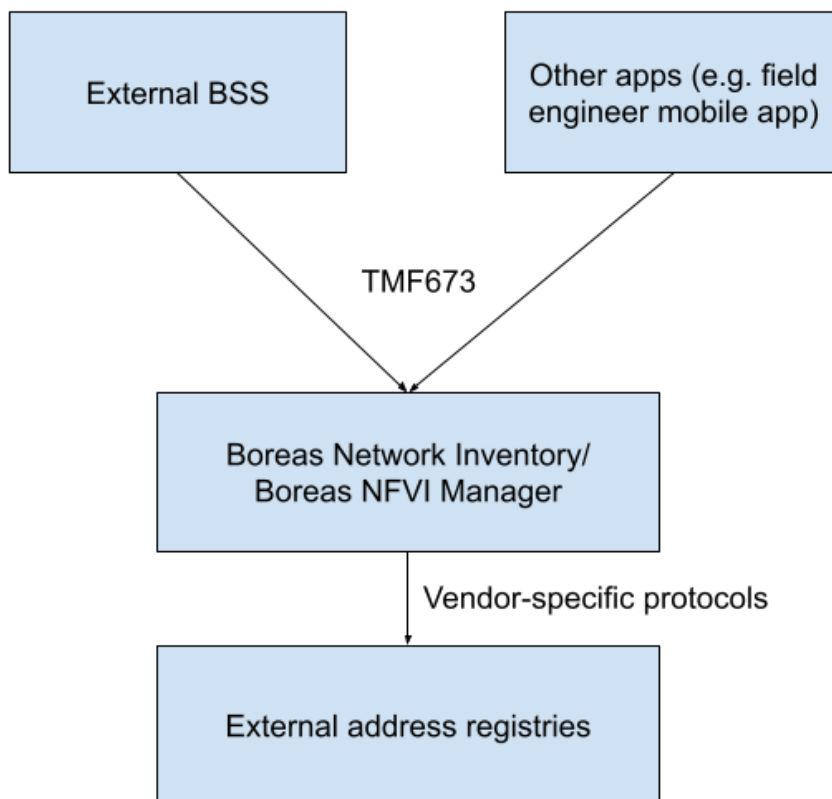

2. Overview of Certified API

To maintain conformance with industry standards and compatibility with third party components, Globberry Boreas Network Inventory and Boreas NFVI Manager support TMF673 API that allows these solutions to provide a consistent and standardized mechanism to query, manipulate and otherwise manage the Geographical address data in their inventory via external systems.

Scope of Geographic Address Management API includes:

- Retrieve, update and delete an existing geographic address and sub-address
- Retrieve, update and delete an existing geographic address validation
- Notify events
