

TM Forum Open APIs Conformance Certification

Company Name:

Telia Company

Product Name and Release Version:

TSI1042 v1.0.0

TM Forum Open API Name and Release Version:

TMF716 – Resource Reservation v4.0.0

Date: 08/06/2026

1. What Product or Solution does your API support?

Telia Company is moving towards ODA. As part of this transformation journey, the target is to provide modern integration capabilities, including standardized Open APIs.

The TMF716 Resource Reservation Management API supports the management of resource reservations, which can be used during order capture and validation to reserve resources such as phone numbers or data numbers. The API provides a standardized REST interface to create, retrieve, list, partially update, and delete Resource Reservation entities. It also provides a dedicated task resource to request the cancellation of an existing reservation.

The 2 main entities entailed in this model are:

- Resource Reservation
- Cancel Resource Reservation

2. Overview of Certified API

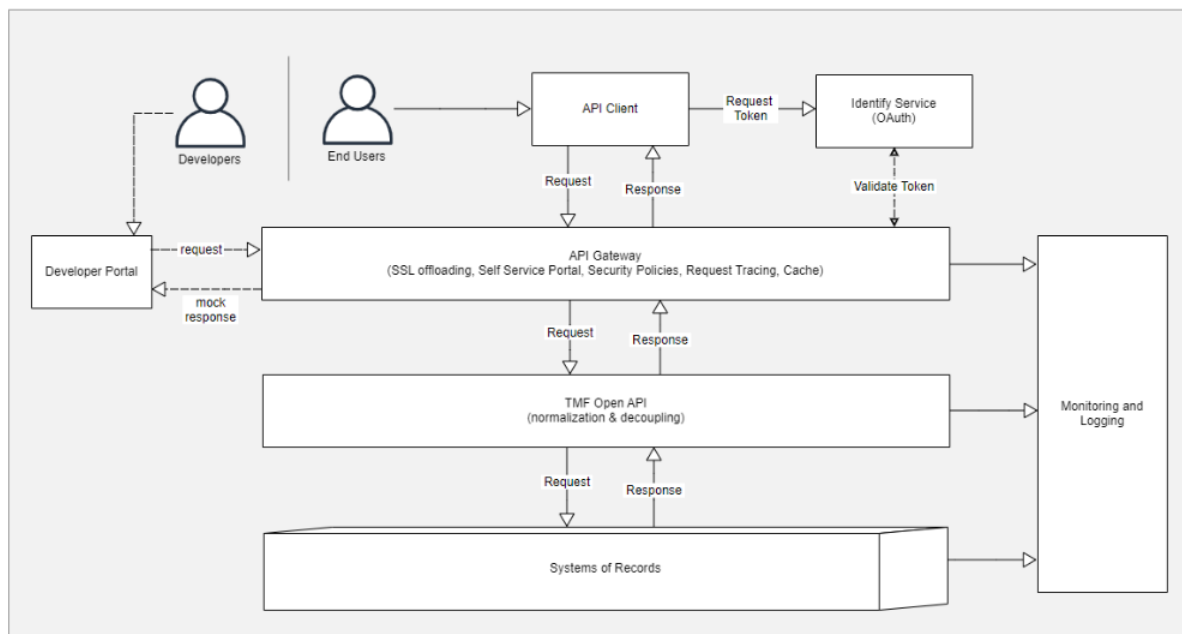

A resource is the generic term used to identify a digital or physical asset that can be used, assigned, reserved, or consumed in the delivery of a service or product.

In this context, the resource can represent a phone number, data number, or another reservable resource that needs to be reserved for a customer during order capture and validation.

This API performs the following operations on these resources:

- Create a Resource Reservation
- Retrieve or find Resource Reservation objects
- Retrieve a Resource Reservation by ID
- Partially update a Resource Reservation by ID
- Delete a Resource Reservation by ID
- Create a Cancel Resource Reservation request
- Retrieve or find Cancel Resource Reservation objects
- Retrieve a Cancel Resource Reservation by ID
