

TM Forum Open APIs Conformance Certification

Company Name:

Telia Company

Product Name and Release Version:

TSI1036 v1.0.0

TM Forum Open API Name and Release Version:

TMF678 – Customer Bill Management v4.0.0

Date: 11/06/2026

1. What Product or Solution does your API support?

Telia Company is moving towards ODA. As part of this transformation journey, the target is to provide various modern integration capabilities, including Open APIs.

The TMF678 Customer Bill Management API provides a standardized mechanism to find and retrieve one or more customer bills, also referred to as invoices, produced for a customer. A customer bill is an electronic or paper document generated at the end of the billing process. It gathers and displays different items, such as applied customer billing rates generated during the rating and billing processes, to be charged to the customer. It represents the total amount due for all products during the billing period and includes significant information such as dates and bill references.

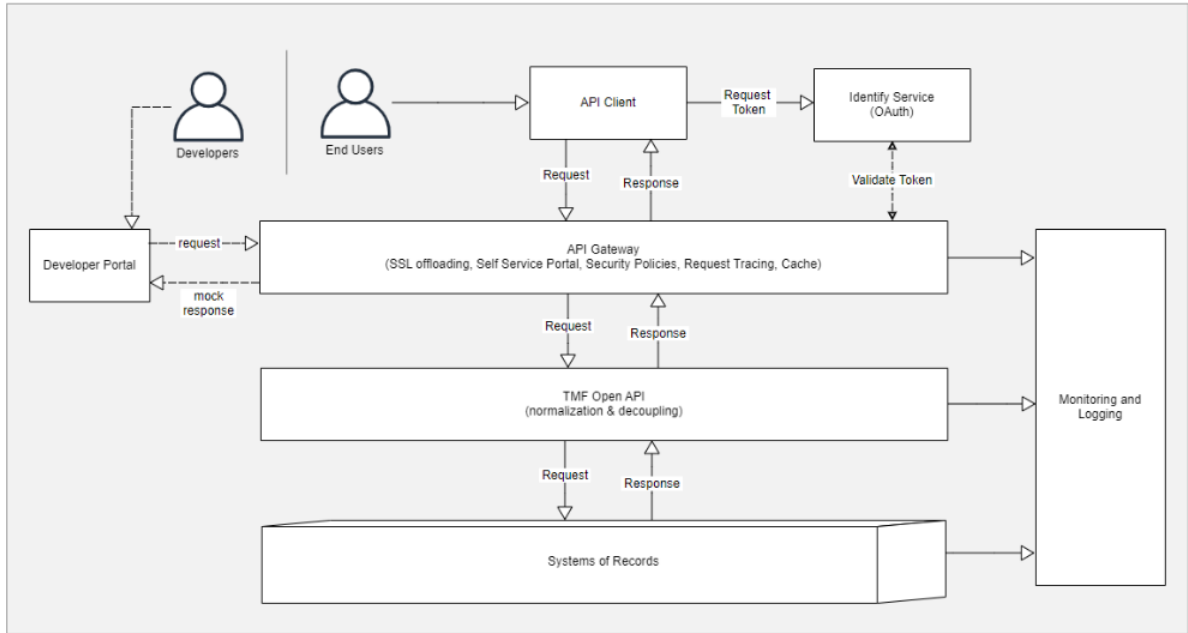

2. Overview of Certified API

The TMF678 Customer Bill Management API enables retrieval and management of customer bills, applied billing rates and on-demand bill generation requests, including support for partial bill updates and event notifications.

The customer bill management API performs the following operations:

- customerBill
- appliedCustomerBillingRate
- customerBillOnDemand
