***TM Forum Open API Name and Release Version:***

*TMF644 – Privacy Management v.5.0.0*

***Date: 08/06/2026***

## 1. What Product or Solution does your API support?

Entel's API Platform has encapsulated and instantiated the Privacy Management API TMF644 to standardized privacy profile types.

Communication Service Providers (CSPs) are constantly working to make their platforms more connected and adaptable. But every time a new feature is introduced, it often means building a new API or making changes to multiple systems. This slows down the launch process, making it harder to meet market demand and missing out on potential revenue.

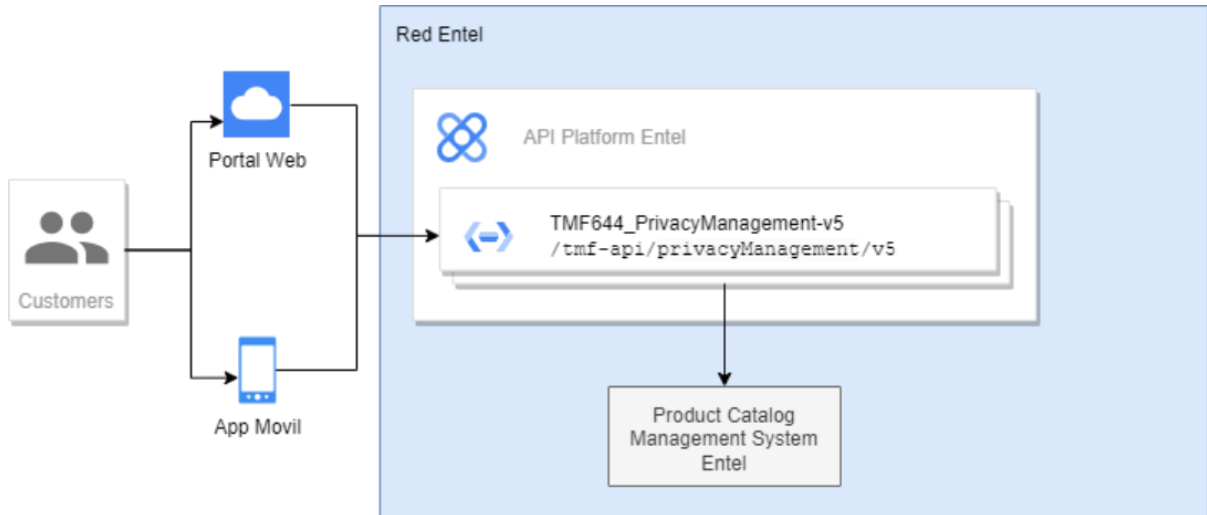

To move faster and deliver better, more tailored experiences, CSPs need to adopt standard APIs like OpenAPI-TMF. These standards help everyone, from CSPs to vendors, speak the same technical language. That means simpler integration, quicker project delivery, and a smoother path to innovation.

## 2. Overview of Certified API

The Privacy management API provides a standardized mechanism for privacy profile types, privacy profiles and privacy agreements such as creation, update, retrieval, deletion and notification of events.

#	Resource	API Overview	Operations Supported
1	PartyPrivacyProfile	List, find by Id, creates and delete profiles.	<ul style="list-style-type: none"><li>● POST</li><li>● GET</li><li>● GET by Id</li><li>● DELETE</li></ul>
2	PartyPrivacyProfileSpecification	List and find by Id profiles.	<ul style="list-style-type: none"><li>● GET by Id</li><li>● GET</li></ul>
