

TM Forum Open APIs Conformance Certification

Company Name:

China Telecom Corporation Limited.

Product Name and Release Version:

China Telecom CNOS-BSS

TM Forum Open API Name and Release Version:

TMF663 – Shopping Cart Management V4.0.0

Date: 11/06/2026

1. What Product or Solution does your API support?

China Telecom CNOS (New-Generation Cloud Network Operation System) is an enterprise-level operation system that integrates and upgrades the existing OSS (for network operation), BSS (for business operation), and MSS. It is one of the main carriers for China Telecom's digital, automated, and intelligent operation management, and an important component of China Telecom digital platform.

The capabilities provided by various capability centers and applied in various application scenario in the CNOS are uniformly aggregated and encapsulated through the atomic capability platform to achieve capability sharing. CNOS and the data middleware enable the interconnection and sharing of production data, and empower production operation through the big data and AI capabilities of the data middleware. Meanwhile based on the unified technology platform of PaaS components, IaaS, and general capabilities of the business centers, cloud deployment and development operation are integrated.

The "Shopping Cart Management API " (TMF663) serves as one of the core components of CNOS's Order Center, this center delivers end-to-end processing for customer telecommunications service orders from order capture to order fulfillment completion, and provides comprehensive order management capabilities covering end-to-end services, all geographic regions and all channels.

This API provides the capability to add multiple product offerings selected by customers into their shopping carts and temporarily store them. It supports customers in ordering all product offerings in the shopping cart at once, as well as ordering a portion of them. It also supports the display of shopping cart item details and operation results.

2. Overview of Certified API

- TMF663 Shopping Cart Management API
