

TM Forum Open APIs Conformance Certification

Company Name:

Entel

Product Name and Release Version:

Open eXperience Layer 2026

TM Forum Open API Name and Release Version:

TMF654 – Prepay Balance Management v.4.0.0

Date: 16/06/2026

1. What Product or Solution does your API support?

Entel's API Platform has encapsulated and instantiated the Prepay Balance Management API TMF654 to standardized privacy profile types.

Communication Service Providers (CSPs) are constantly working to make their platforms more connected and adaptable. But every time a new feature is introduced, it often means building a new API or making changes to multiple systems. This slows down the launch process, making it harder to meet market demand and missing out on potential revenue.

To move faster and deliver better, more tailored experiences, CSPs need to adopt standard APIs like OpenAPI-TMF. These standards help everyone, from CSPs to vendors, speak the same technical language. That means simpler integration, quicker project delivery, and a smoother path to innovation.

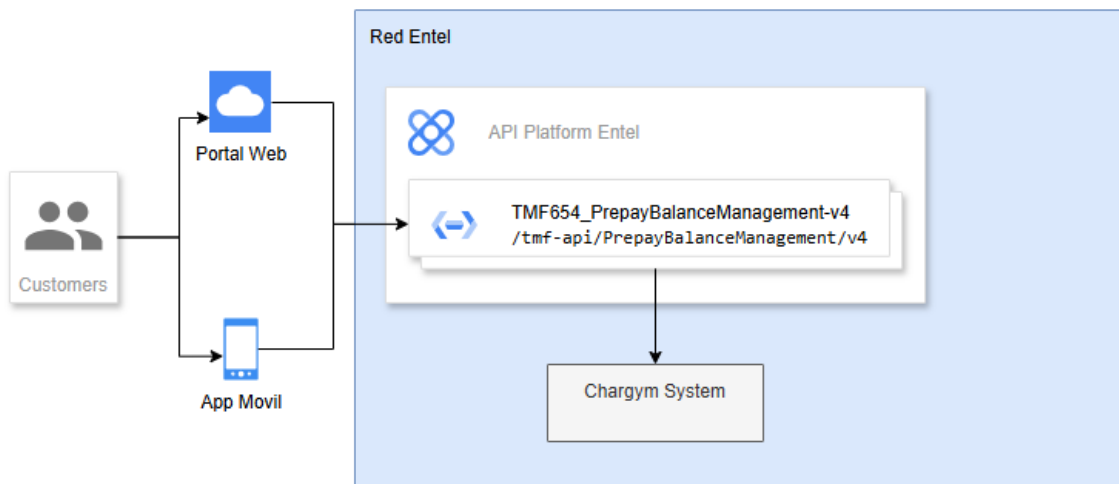

1. Overview of Certified API

The Prepay Balance API provides a standardized mechanism for privacy profile types, privacy profiles and privacy agreements such as creation, update, retrieval, deletion and notification of events.

| # | Resource | API Overview | Operations Supported |
|---|--------------|--|--------------------------|
| 1 | Bucket | A bucket represents a balance of a given type (monetary, data, SMS, etc.) held by a customer. It can be queried to check remaining amounts, validity periods, and usage types. | GET GET BY ID |
| 2 | TopupBalance | A topup balance is an action of adding balance to a bucket. It | GET POST GET BY ID |

| | | | |
|---|----------------|---|--------------------------|
| | | enables recharging prepay accounts with monetary or data amounts, linking to specific buckets or products. | |
| 3 | AdjustBalance | An adjust balance is an action that modifies the balance of a bucket. It supports both credit and debit adjustments on prepay accounts, with optional usage type specification. | GET POST GET BY ID |
| 4 | ReserveBalance | A reserve balance is an action that reserves an amount from a bucket for a specific purpose. It holds a portion of the balance until released or consumed, associated with a related party. | GET POST GET BY ID |
