

TM Forum Open APIs Conformance Certification

Company Name:

Entel

Product Name and Release Version:

Open eXperience Layer 2026

TM Forum Open API Name and Release Version:

TMF679 – Payment Management v.4.0.0

Date: 16/06/2026

1. What Product or Solution does your API support?

Entel's API Platform has encapsulated and instantiated the Payment Management API TMF654 to standardized privacy profile types.

Communication Service Providers (CSPs) are constantly working to make their platforms more connected and adaptable. But every time a new feature is introduced, it often means building a new API or making changes to multiple systems. This slows down the launch process, making it harder to meet market demand and missing out on potential revenue.

To move faster and deliver better, more tailored experiences, CSPs need to adopt standard APIs like OpenAPI-TMF. These standards help everyone, from CSPs to vendors, speak the same technical language. That means simpler integration, quicker project delivery, and a smoother path to innovation.

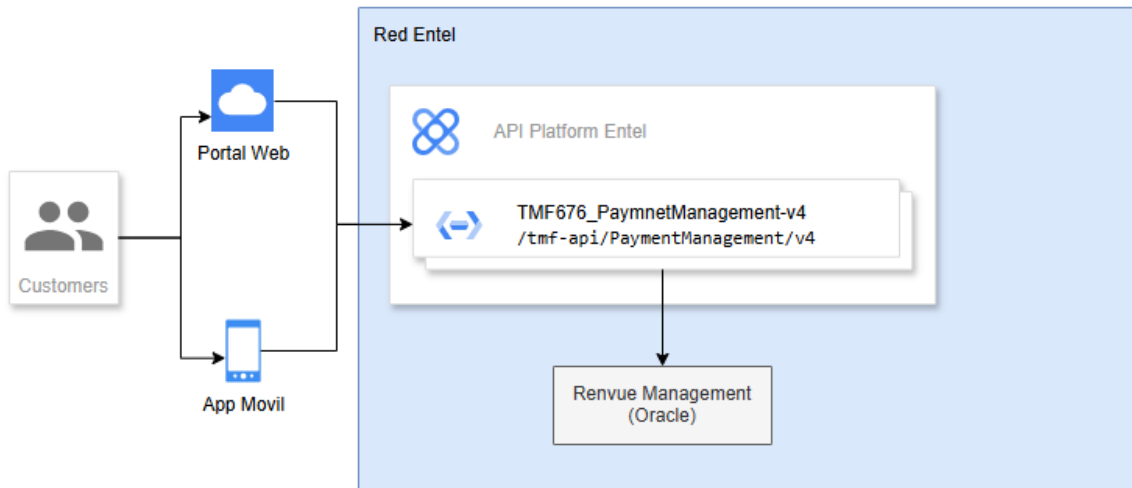

1. Overview of Certified API

The Payment Management API provides a standardized mechanism for privacy profile types, privacy profiles and privacy agreements such as creation, update, retrieval, deletion and notification of events.

#	Resource	API Overview	Operations Supported
1	payment	This API provides the standardized client interface to Payment Systems for managing performed payments or refunds. Examples of Payment API originators (clients) include Web servers, mobile app servers, Contact center dashboards or retail store systems.",	Resource Order GET POST GET BY ID

2	Refund	This operation list or find Refund entities"	GET POST GET BY ID
