*TMF678 – Customer Bill Management v.5.0.0*

***Date: 16/06/2026***

# 1. What Product or Solution does your API support?

Entel's API Platform has encapsulated and instantiated the Customer Bill Management API TMF678 to standardized privacy profile types.

Communication Service Providers (CSPs) are constantly working to make their platforms more connected and adaptable. But every time a new feature is introduced, it often means building a new API or making changes to multiple systems. This slows down the launch process, making it harder to meet market demand and missing out on potential revenue.

To move faster and deliver better, more tailored experiences, CSPs need to adopt standard APIs like OpenAPI-TMF. These standards help everyone, from CSPs to vendors, speak the same technical language. That means simpler integration, quicker project delivery, and a smoother path to innovation.

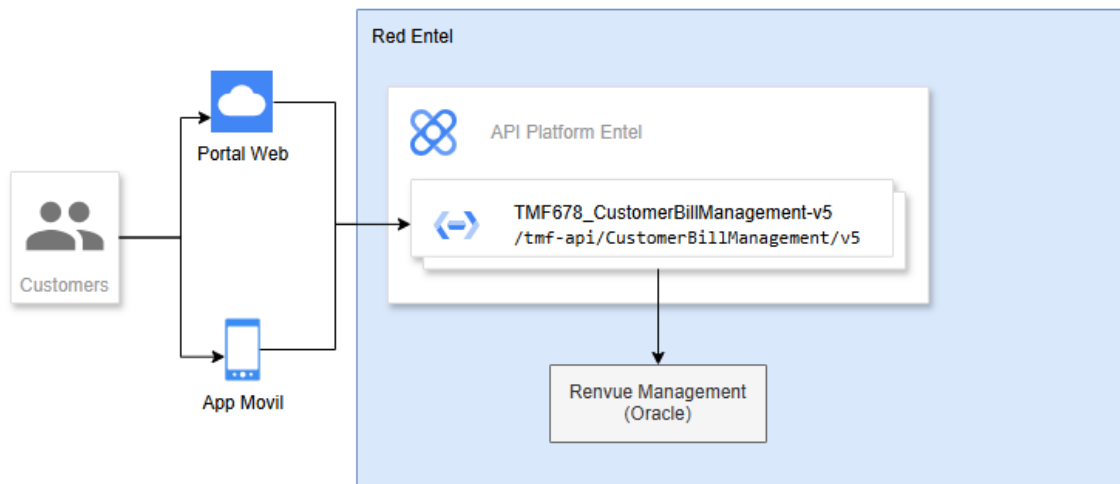

## 1. Overview of Certified API

The CustomerBill API provides a standardized mechanism for privacy profile types, privacy profiles and privacy agreements such as creation, update, retrieval, deletion and notification of events.

#	Resource	API Overview	Operations Supported
1	CustomerBiiOnDemand	Create a customer bill on demand request, retrieve one or a collection of customer bill on demand request(s) depending on filter criteria.	<b>Resource Order</b> GET POST GET BY ID

2	CustomerBill	<p>The Customer Bill Management API allows to find and retrieve one or several customer bills (also called invoices) produced for a customer.</p>	<p><b>GET</b> <b>GET BY ID</b> <b>PATCH</b></p>
3	CustomerBillRate	<p>This API provides also operations to find and retrieve the details of applied customer billing rates presented on a customer bill.</p>	<p><b>GET</b> <b>GET BY ID</b></p>
4	Cycle	<p>This operation retrieves a BillCycle entity. Attribute selection enabled for all first level</p>	<p><b>GET</b> <b>GET BY ID</b></p>
