Safe In-Person HOLIDAY SHOPPING RECOMMENDATIONS

Avoid shopping in person if you have symptoms of COVID-19, have recently been exposed to COVID-19, or tested positive for COVID-19 in the past 14 days.

Before entering a store, wear a cloth face covering that covers your nose and mouth and use hand sanitizer.

Try to only touch the products you plan to purchase.

If you are using a shopping cart or basket, disinfect with wipes if available.

If possible, use contactless payment options. Pay without touching money, a card, or a keypad.

Use marked entry and exit points and follow any directional signs or floor markings to maintain six feet of distance between you and other shoppers.
