Are You Interested In Bipolar Disorder Research?

Researchers at Dell Medical School at The University of Texas at Austin are looking for children and young adult participants to volunteer in a study of how brain biology is related to possible risk for developing bipolar disorder. We at the Department of Psychiatry are inviting you to consider participating as a volunteer in this research.

Qualified participants must:
• Be between the ages of 14 and 21
• Not be currently diagnosed with bipolar disorder or psychosis
• Either at least one parent with a history of bipolar disorder OR no bipolar disorder in any first- or second-degree relatives.
• Be willing to undergo an MRI scan.

Qualified participants receive:
• You will be compensated for all study components completed, which can be up to $1850 for full participation.

If your child would like to participate or if you have questions, contact the lab at NECTARY@austin.utexas.edu or 512-471-0020.

This study has been approved by The University of Cincinnati Institutional Review Board.
