

# CAR SEAT SAFETY PROGRAM

Redington-Fairview General Hospital

**Our Certified Child Passenger Safety Technicians are here to help you keep your child safe!**

## Car Seat Inspection

Any adult with a car seat or booster seat in their vehicle is eligible for a safety inspection.

Our technicians help families understand correct installation of their seat and how to keep children safe during vehicle rides!

## Car Seat Distribution

Families who receive MaineCare, TANF, SNAP, WIC, or are foster parents are able to request a convertible car seat or a high back booster seat.

Our technicians help eligible families understand how to install the seat and keep their child safe during vehicle rides!

## Our Technicians

Redington-Fairview General Hospital is proud to have Certified Child Passenger Safety Technicians (CPSTs) throughout our organization. All of our CPSTs have been certified through the National Child Passenger Safety Certification course, provided by Safe Kids Worldwide.

Our organization can also help provide support to parents/caregivers who are in need of, or use, adaptive seats for their children with special healthcare needs.
