

Kankakee County GIS Committee Meeting Agenda
Kankakee County Administration
189 East Court Street, Kankakee, Illinois
2nd Floor Conference Room
Friday, July 13, 2018 at 9:00 a.m.

1. Call to Order
2. Roll Call (Sign-In Sheets)
3. Public Comment
4. Progress Report on
 - Recently Completed Projects
 - Ongoing Projects
5. 2018 Program of Work
 - List of Identified Projects of Departmental Need
 - Prospective Projects for Departmental Growth
6. Old Business
7. New Business
8. Adjournment

-- Meeting was called to order at 9:03 am. Roll was taken; Committee Chair George Washington Jr. initially allowed the meeting to begin absent a quorum -- approximately 5 minutes after proceeding a delayed member arrived. It was then that a quorum was reached. --

There was no public comment.

Mr. Bishop began by presenting the projects completed since the previous January meeting. These included:

Census BAS and LUCA programs, webmap and database construction for the Kankakee Area Transportation Study (KATS), Assessment geodatabase rollover execution and procedure writing, Illinois Department of Revenue MyDEC script maintenance/delivery timing adjustment, Kankakee/Iroquois Feb 2018 Flood FEMA data collection Survey App, NWS 9.5 "Go-Live" system support, NWS data-viewer webapp, Offender Watch geodata formatting & delivery, Department of Homeland Security geospatial data infrastructure access, and with regard to GIS department maintenance Mr. Bishop upgraded of Developer Webapp Builder to 2.7 and conducted PostgreSQL \ PostGIS database installs on the new Data Server.

This lead into a listing of ongoing Projects for the GIS department, and thusly, Mr. Bishop. First among the topics covered were GIS department priorities. These include addressing STORM server cloud IP updates, continuing geodata transfers to the new Data Server, securing a data access partnership with the Illinois Department of Natural Resources, and market research for Orthography / Planimetric data purchasing in 2020.

External department projects were also addressed. These include data acquisition, cleaning, formatting, analysis for a Highway Department County Vehicle Accident Map, a Disaster Response Map build within the HSIN Portal and tactile Community Street Maps for County Emergency Management, and for 911 response Mr. Bishop listed NWS error: Address - Centerline data editing, NWS mobile interface map design and data additions, and Sheriff & Kankakee City policing boundary agreement spatial editing.

Lastly, Mr. Bishop made the committee award that he will be co-presenting and a panelist at the Illinois Geographic Information Systems Association meeting in October 2018 on his collaboration with Will Co. in response to the February 2018 flood and discussion concerning increasing communication as well as collaborative efforts between county GIS departments.

Mr. Bishop then addressed several areas of departmental need. These were a combinations projects presented to the committee in the past yet to be taken up and GIS work requested by other departments. Projects already brought before the committee include script migration and updating (Parcel Script 2.0), Recorder Office integration with K3-mapper, ESRI Portal infrastructure considerations, and the need for a coordinated review and standardization of address as part of a broader investment in data review & updating efforts.

Health Department needs of sectional polyline data construction and training for Well-hole GPS data collection were briefly mentioned as was the Building Department's request for a Violation geo-database / webapp. Mr. Bishop also cited the need to coordinate FEMA data collection between Building Depts and Emergency Management entities.

Lastly, Mr. Bishop told the committee of prospective projects that the GIS department could take on in future depending upon the workload and resources allowed to the department. Increasing coordination with partnering Municipalities and county departments to reduce redundancies and build geographic system workflow collaborations, discuss data needs / possibilities / collection, and advanced User GIS training is a high priority for the GIS department if it is possible. Summer and Fall internship program continue to be of interest to the department, but the idea has not seeing any progress. Mr. Bishop concluded his presentation with a list of mapping possibilities, these include:

A tactile Kankakee County transportation map, election \ voter maps, philanthropic \ non-profit community maps, food desert maps, and opioid / naloxone web maps. Laurie Gadbois and Laurie Cyr suggested the additional possibility of Zagster bike sharing / Bicycle path & trails maps.

There was no Old Business

Under New Business Pete Schiel proposed the committee begin the process to officially recommend additional personnel be brought on to take some of the New World Systems mapping requirements off of the GIS department workload. George Washington Jr. proposed that he first contact Delbert Skimmerhorn concerning Mr. Schiel's recommendation -- this proposal was seconded by Laurie Gadbois and the members voted unanimously in affirmation.

George Washington Jr. then moved to adjourn, seconded by Ms. Gadbois. The motion carried. Meeting Ended at 9:54 am.
