

# QUIET GRIP™ TREAD SYSTEM

Quiet Grip™ tread system consists of bolt-on, non-slip metal tread covers coated with a permanent, abrasive polyurethane coating

- ✓ Cost-effective, sound-dampening, non-slip tread system for egress stairs
- ✓ Costs less and installs faster than site-poured concrete treads
- ✓ Available in choice of custom powder coat color

|  | QUIET GRIP™ TREAD SYSTEM | 3/8" DIAMOND PLATE TREADS | EPOXY-COATED TREADS | METAL PAN TREADS + POURED CONCRETE |
|--|--------------------------|---------------------------|---------------------|------------------------------------|
| Tread materials                        | \$57                     | \$65                      | \$60                | \$35                               |
| Temporary inserts/protective coverings | \$0                      | \$0                       | \$8                 | \$20                               |
| Concrete materials and installation    | \$0                      | \$0                       | \$0                 | \$35                               |
| <b>COST PER TREAD</b>                  | <b>\$57</b>              | <b>\$65</b>               | <b>\$68</b>         | <b>\$90</b>                        |

**37%**  
COST SAVINGS  
VS. CONCRETE

## Contrast nosing

Optional contrast nosing is available for stairs with the Quiet Grip™ tread system.

The addition of nosing in a contrasting color provides an extra measure of safety by helping users visually identify the presence of a step edge.

### Quiet Grip™ for industrial stairs

Alternating tread stairs and prefabricated metal stairs can be finished with the same non-slip surface as the Quiet Grip™ tread system. For industrial stairs, the non-slip surface is applied directly to the treads as a powder coat finish.
